

Johnson St NE/35W

Intersection Improvements

Project Background

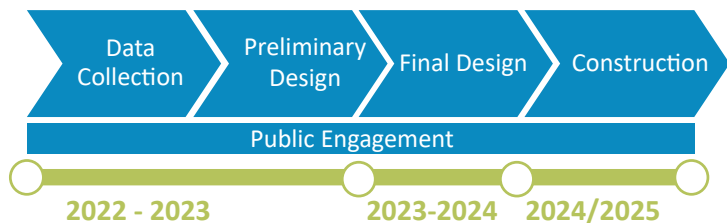

The City of Minneapolis is planning to reconstruct the intersection including Johnson St NE and the ramps leading to I-35W. The project intends to improve the safety, comfort, and travel experience for all people using the intersection and better meet the needs of the community. Reconstructing the intersection will provide the opportunity to improve the design and operation of the existing intersection, install new pedestrian ramps and signals, improve the safety and comfort of the existing sidewalks, and close bikeway gaps. The project will also create a better environment for accessing transit routes, especially as transit availability in this area is growing. Planning and design will start in 2022 and continue into 2024. Construction is planned for 2024 or 2025.

Project Goals

The primary goal of this project is to improve the safety, comfort, and travel experience for all people using the intersection. Additional project goals include:

- Improve sidewalk connectivity and upgrade pedestrian ramps and signals
- Eliminate an existing bikeway gap along Johnson St NE
- Improve the design and operation of the existing intersection
- Incorporate Green Stormwater Infrastructure and Sustainable Landscaping
- Improve the transit stops and experience along Johnson St NE
