

31ST ST W

Holmes–Nicollet | Vision Zero safety improvements

What we know

- Traffic safety impacts everyone
- A small amount of our streets (9%) are where the majority of severe and fatal crashes happen (66%)
- People walking and biking, and historically marginalized groups are overrepresented in severe and fatal crashes
- Quick-build safety improvements are proven quick and effective ways to address traffic safety

Safety improvements

- 31st St W is identified as a High Injury Street from Holmes Ave to Nicollet Ave
 - High Injury Streets are streets where the highest number of severe and fatal crashes occur in Minneapolis
- Quick-build safety improvements will be installed in 2023
- The type of improvements you will see along 31st St W this year will include:
 - bumpouts
 - hardened centerlines
 - reflective backplates

Our Goals

SAFER STREETS FOR WALKING & ROLLING

SAFER ROUTES FOR BIKING

SAFER STREETS FOR ALL PEOPLE

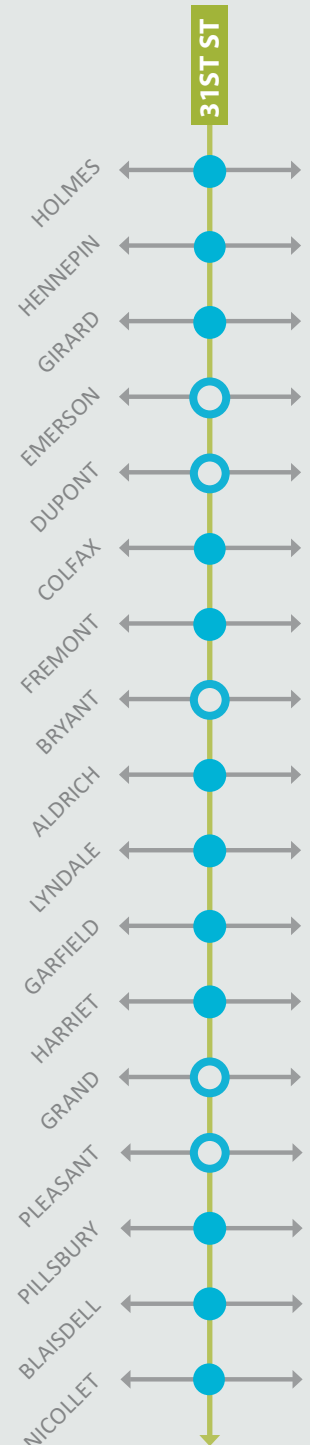

EQUITABLE OUTCOMES FOR ALL COMMUNITIES

Safety improvements will be installed at the following intersections:

31st St W

● Intersection with planned Vision Zero improvements

○ Intersection with existing or recent safety improvements

Vision Zero Action Plan

This project is aligned with the Vision Zero Action Plan, the City's vision for creating safer streets and eliminating all traffic deaths and severe injuries on our streets.
