

DOWNTOWN INTERSECTIONS

Various intersections | Vision Zero safety improvements

What we know

- Traffic safety impacts everyone
- A small amount of our streets (9%) are where the majority of severe and fatal crashes happen (66%)
- People walking and biking, and historically marginalized groups are overrepresented in severe and fatal crashes
- Quick-build safety improvements are proven quick and effective ways to address traffic safety

Safety improvements

- There are several streets throughout downtown that are identified as a High Injury Streets
 - High Injury Streets are streets where the highest number of severe and fatal crashes occur in Minneapolis
- This year, quick-build safety improvements will be installed at various intersections throughout downtown along 1st Ave, 3rd St, 4th St, 9th St, 10th St, 11th St, and 12th St
- The type of quick-build improvements you will see throughout downtown this year will include:
 - bumpouts
 - hardened centerlines
 - bike conflict zone markings

Our Goals

SAFER
STREETS FOR
WALKING &
ROLLING

SAFER ROUTES
FOR BIKING

SAFER
STREETS FOR
ALL PEOPLE

EQUITABLE
OUTCOMES
FOR ALL
COMMUNITIES

Downtown Intersections Safety Improvements:

30 INTERSECTIONS
IMPROVED

23 BUMPOUTS

30 HARDENED
CENTERLINES

27 RETROREFLECTIVE
BACKPLATES

6 BIKE CONFLICT
STRIPING

Vision Zero Action Plan

This project is aligned with the Vision Zero Action Plan, the City's vision for creating safer streets and eliminating all traffic deaths and severe injuries on our streets.

2023 VISION ZERO CORRIDORS

**DOWNTOWN
INTERSECTIONS**

- 2023 VZ Project Locations
- Downtown Intersections

Quick-build safety improvements will be installed at various intersections throughout downtown along the following streets:

- 1st Ave
- 3rd St
- 4th St
- 9th St
- 10th St
- 11th St
- 12th St

The City has created an online map where community members can explore the planned improvements for each of the 2023 corridors. Please use the QR code (right) to access this map.
