Scale:
1/4 mile or a 5 minute walk

How many ____ does it take to get from your home to your school?

OK, now calculate how many miles your school is from your home.

Remember that **4x** your finger measurement equals a mile; like this:

How long would it take to walk that distance?

How far is the closest park to your home?

What about the closest rec center?

How about the closest library?

Minneapolis Walking Routes for Youth are an active way to get to and from schools, parks, libraries and other neighborhood destinations.

The Neighborhood Walking Routes can be bike friendly for children, while Busy Walking Routes are not. More information about biking in the city can be found on the Minneapolis Bike Map (cover image at right). Pick up a copy at your local library.
