

*“Within 120 calendar days of the Effective Date, the City will identify and repair or replace any non-functioning or malfunctioning in-car cameras. Thereafter, MPD will require that when officers are assigned to MPD vehicles that are equipped with in-car cameras, the officers will check that the cameras are fully functional at the beginning of each shift and make appropriate notifications when they are not, and the City will repair or replace any non-functioning or malfunctioning in-car cameras within 30 calendar days of an officer’s report.”*

Aimed at enhancing the transparency, accountability, and evidence collection within the Minneapolis Police Department, the MPD has outfitted its vehicles with three Axon cameras to document interactions between officers and the public during routine patrols, traffic stops, and other law enforcement activities. These cameras are positioned to capture audio and visual footage, providing an unbiased account of events unfolding. The footage is valuable for investigating complaints against officers, evaluating conduct, providing crucial evidence in criminal cases.

Since last update, the Implementation Unit finalized the initial check of all 187 vehicles finding 186 in working order with only one vehicle not operated because it is out of service. Prior to that vehicle re-entering service, if it re-enters service, the Implementation Unit will confirm functionality of the camera.

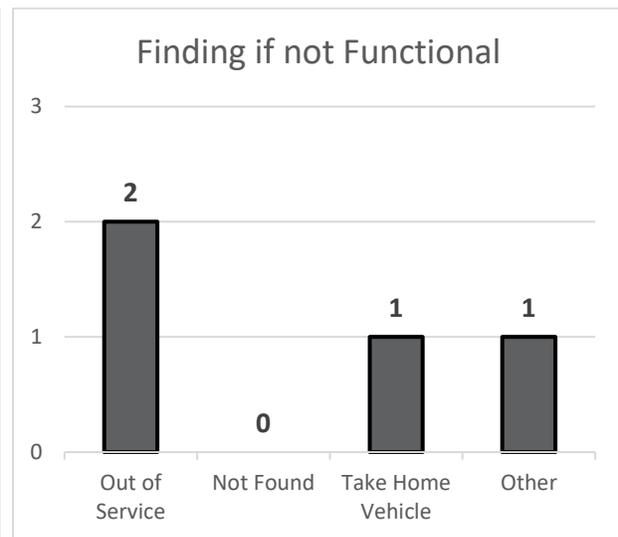

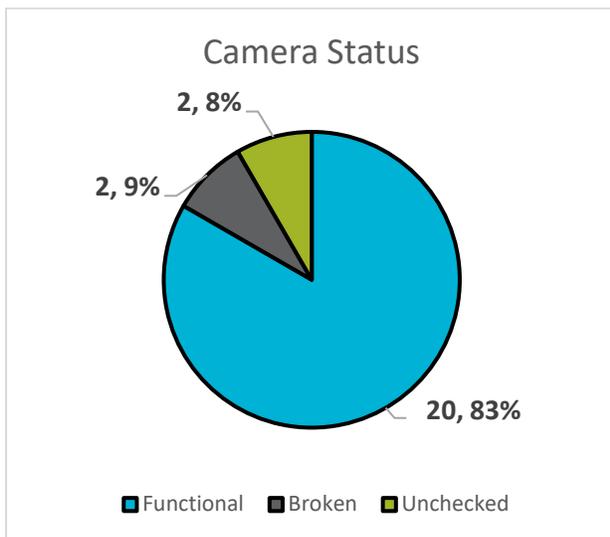

Currently, there are no squad cars in use that have a non-functional camera.

As we have completed the initial audit of all car cameras, the Implementation Unit plans to conduct monthly audits of a random sample of cameras from each precinct and specialty units moving forward. The Unit will generate a similar report to distribute as the below. In addition, the MPD Business Technology Unit is incorporating a ticketing process to allow the Implementation Unit to audit records to ensure the 30-day repair/replacement deadline is followed and will be included with the report.

**The Sample Report (All Numbers are Illustrative)**

Over the past reporting period, X number of car cameras were checked for functionality. The Unit found Y% of cameras to be operational and functional. <Insert commentary/issues identified/etc>

Currently, there are no squad cars in use that have a non-functional camera.
