

“Within 120 calendar days of the Effective Date, the City will identify and repair or replace any non-functioning or malfunctioning in-car cameras. Thereafter, MPD will require that when officers are assigned to MPD vehicles that are equipped with in-car cameras, the officers will check that the cameras are fully functional at the beginning of each shift and make appropriate notifications when they are not, and the City will repair or replace any non-functioning or malfunctioning in-car cameras within 30 calendar days of an officer’s report.”

Starting with the April 2024 audit of mobile video recorders (MVR), the sample size of randomly selected vehicles from the MPD patrol fleet was doubled to 36. This now entails 6 vehicles per precinct and the collective specialty units. This month **there were 33 vehicles inspected where the main cameras displayed successful start-ups**. Two vehicles from precincts 2 & 3 were inaccessible due to them being delivered to Ford dealerships for repairs. Another 4th precinct vehicle was under active repairs at the City maintenance facility. This audit took place on April 8 – 11, 2024.

While the ticketing system for tracking deficient cameras was recently implemented, the dashboard feature is still in the works. In this past period, there were 2 vehicles with a MVR that required repairs and were reportedly serviced in less than a week.
